

PLATTMANN CONSULTING

ALTERNATIVE ENERGIES

WWW.PLATTMANN.COM

As technical consultants for industrial plants we look back on a long lasting experience in third generation. We combine approved know-how and best-in-class technology to provide reliable and innovative solutions for the process industries.

Lasting profitability is ensured by developing tailor-made solutions for the special technical requirements of our clients. The range of applying successfully field-proven solutions covers the optimal integration of different project phases as technical feasibility study, realization, commissioning and after sales service.

For us, a personal and an exceedingly customized consulting is self-evident. In our long standing relationships with all our clients we are always very concerned to meet this claim.

With our world-class partners presented in this folder we possess the best conditions to provide our clients with top-quality technology and equipment.

Meeting global requirements we provide technology transfer from Europe to Latin America.

Alternative fuel handling and storage

Alternative fuel processing

Dust free transport system

WASTE HANDLING TECHNOLOGY

Vecoplan AG develops, designs, manufactures and installs solid waste and biomass processing, storage and transport systems. Based in Germany the company has long standing references with all major cement groups worldwide. Innovative equipment such as the torque drive for shredders, the Vecobelt and the Vecojector allow for flexible integration of alternative fuel systems into existing plant layouts. Vecoplan has a substantial know-how for setting up complete systems for RDF-handling which secures an unique and guaranteed process availability.
